DETAILED ACTION

1. Applicant amendment filed on 9/25/07 has been fully considered and made of record.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-3, 6, 8, 18-20, 22, 23 and 25, are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakemi et al (US 5,655,704) in view of US provisional application No. 60/078472 to Fjelstad. This rejection set forth in prior Action dated 7/20/07, paragraph 3.

Response to Arguments

4. Applicants' arguments filed on 9/25/07 have been fully considered but they are not persuasive.

In response to applicants' argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re*

Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, it is clearly that both inventions is in the same field of the present invention, and the motivation for the combination can be found in either in the references (see col. 7, paragraph 1 of the patent as well as page 2 , lines 11-17 of the NPL).

Further, Applicants' arguments (see "Remarks", page 7, paragraph 1) regarding "the dispensing of the solder ball in recesses or level surface of the of the substrate". The Examiner disagrees because the substrate having a recesses does not further limit the claimed system and it appears that the system of the prior art references capable of fulfill the function including for dispensing of the solder ball in recesses or level surfaces of the substrate if necessary. For above reasons, the combination prior reference can be used to place the solder ball regardless of the surfaces structural element of the associated substrate.

Regarding the arguments that the Fjelstad does not teach the space between the hopper and the stencil (see "Remarks", page 7, paragraph 2). The Examiner disagrees and refers Applicants to Fig. 2 of the Fjelstad which depicts the above configurations where the spacing existed between the stencil 130 and the hopper 120.

Interviews After Final

5. Applicants note that an interview after a final rejection will not be granted unless the intended purpose and content of the interview in presented briefly, in writing (the agenda of the interview must be in writing). Such an interview may be granted if the examiner is convinced that disposal or clarification for appeal may be accomplished with

only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations which would require more than nominal reconsideration or new search will be denied. See MPEP 714.13 and 713.09.

Conclusion

6. It is noted that any amendment made to the disclosure and the claims. Applicant requires to point out the support provide numeral references to the claimed limitations as well as support in the disclosure (i.e., page and line numbers and reference number associated with from the drawings) for better clarity (See 37CFR 1.111 and section 2163.06 of the MPEP).

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
